Today I’m going to tell you the story of cottenvan you see I’ve been doing a Age of Conflict world but i’ve been recording all of it in part 2 11:16 in cottenvan appeared see that little spot that's cottonvan he came right at the end of the purple era in 1616 he went to war against Barstan and grew, a lot, he later took over west China and japan and also this little spot up here he didn’t change until he went to war against yellowland and took over **half of Asia and quickly took over the rest** yellohieght was a thorn in his but at the bigging of part 3 it was dead cottenvan turns 1000 but then Purple and hellcorner teamed up and he lost a good amount of territory he gained most of it back but then miloington took southeast Asia then they did it again he nearly died his capital was even taken this was definitely a all time low in 2896 he grew slowly though 2 wars that he just bareilly won until he allied to elfficorner and killed cottenmeado at this point elfficorner GROWS a ya look at that and cottenvan is it’s alli until he isn’t and the go to war which cottenvan wins and it is at it’s peak yes this is the largest cottenheven will ever get will be ~3600 and it just keeps growing with is alli in unowood the dou seem unstoppable on cottenvan 2000th birthday beening the biggest country on both his 1000th and 2000th birthday what a legend but on the year 3717 revolts break out but he contains them then revolts break out but he contains them now cottenvan is running into a problem he ran out of things to kill so it has’t to kill unoheven it’s mostly a stalemate the two nations trading territory back and fowth but a revolt in unoheven causes it to lose and cottenvan gets to a new peak in around the year ~4200 uno wood quickly falls and cottenvan takes over Austrailia but before he can do that Starhaven revolts and takes a huge portion of land and yellowhaven and helron take advantage of the weakened cottenvan a 3 v 1 not nealy fair and cottenvan dies on the year 4398 the finishing blow being dealt by helron at a final age of 2782 by the end of its life cottenvan had both the all time oldest record and the all time biggest record no country has remotely like it.
